Wiring Device-Kellems has expanded its line of weatherproof plates to include a new series of deep cover hoods. These deep covers are NEMA 3R rated and have been designed for use in wet locations with the covers closed, and like other Hubbell cover plates, meet the NEC 410-57(b) requirements for unattended use. The cast aluminum covers are ideal for heavy abuse areas, the non-metallic version is for use in locations which require more aesthetic appeal.

Ordering Information - Outlet Box Hoods

Metallic - Cast Aluminum

**Single-Gang Vertical**

**Specification Data**

Metallic

- Die cast Alloy 360 copper-free* aluminum for maximum corrosion resistance and durability.
- *Alloy 360 has less than .004 copper content.
- Finish is baked aluminum lacquer.

Nonmetallic

- Impact resistant polycarbonate, an extremely durable thermoplastic.
- Transparent cover provides visibility to the connection.

**Technical Data**

- Devices not included.
- Holes for padlocks are 1/4" (6.4dia.).
- Drill points in four corners for box mounting

**ALL**

- NEMA 3R rating when used with the appropriate outlet box which are intended for outdoor use primarily to provide a degree of protection against rain, sleet, and damage from external ice formation.
- Box or device mount for flexibility of installation.
- Gaskets are closed-cell foam.
- Meets OSHA lockout/tagout requirements.
- Latching covers hold securely.
- Large cord openings.
- Clearly marked UL and CSA logos.

**Technical Data**

- Covers include gasket and mounting screws, lids have gasketless design.
- UL Listed/CSA Certified.
Low Profile Weatherproof Cover

For maximum in-use protection

These standard weatherproof plates have the low profile design you’re familiar with and are equally approved to withstand rain spray as certified by UL. They also have an IP44 suitability to protect against fine particle penetration and splashing. These traditional covers work well where weatherproof protection is required and space is a concern, such as equipment panels or vehicle mounting.
