

Twist-Lock® Receptacles for Data Centers and Financial Institutions

Blue Twist-Lock® Receptacles

Modern data centers are now requiring identification of circuits that are protected by an Uninterruptable Power Supply (UPS). Hubbell's offering of blue Twist-Lock devices provides the necessary color coding and are readily available from stock.

Isolated Ground Twist-Lock® Receptacles

Hubbell uses insulation barrier construction to isolate the ground contacts from the mounting strip, providing a clean, noise-free ground for sensitive equipment.

- High-Impact, abuse-resistant nylon face
- Back and Side Wire terminations with #10 terminal screws
- One piece contact design prevents overheating
- All brass mounting and grounding system
- Glass reinforced thermoplastic polyester base provides high heat resistance
