

Marine White Ship to Shore Cable Sets

HUBBELL

Hubbell Marine has expanded its line of ship to shore products to include cable sets in white. This new offering corresponds with the trend toward accessories which compliment modern boat finishes. Like the traditional yellow, these cable sets include all the high performance ben-

efits you expect from Hubbell products. Completely factory pre-wired and fully molded on devices are designed to coil easily and lie flat. In addition to popular 30 and 50 amp configurations, white telephone, television and international cables are also available.

Features

- All White Cable and Connections
- Fully Molded
- UV Stabilized Materials
- Corrosion Resistant
- Breadth of line

Benefits

- Satisfies boat builder and owner demands for contemporary all white marine accessories.
- Over mold design totally encases connections in solid PVC material for superior waterproofing and durability.
- Produced with materials which include special additives that resists breakdown from exposure to ultraviolet rays.
- Electrical contacts are nickel plated brass for corrosion resistance, durability and performance.
- Available in various lengths and configurations including phone, TV and international.

Quality Hubbell Features

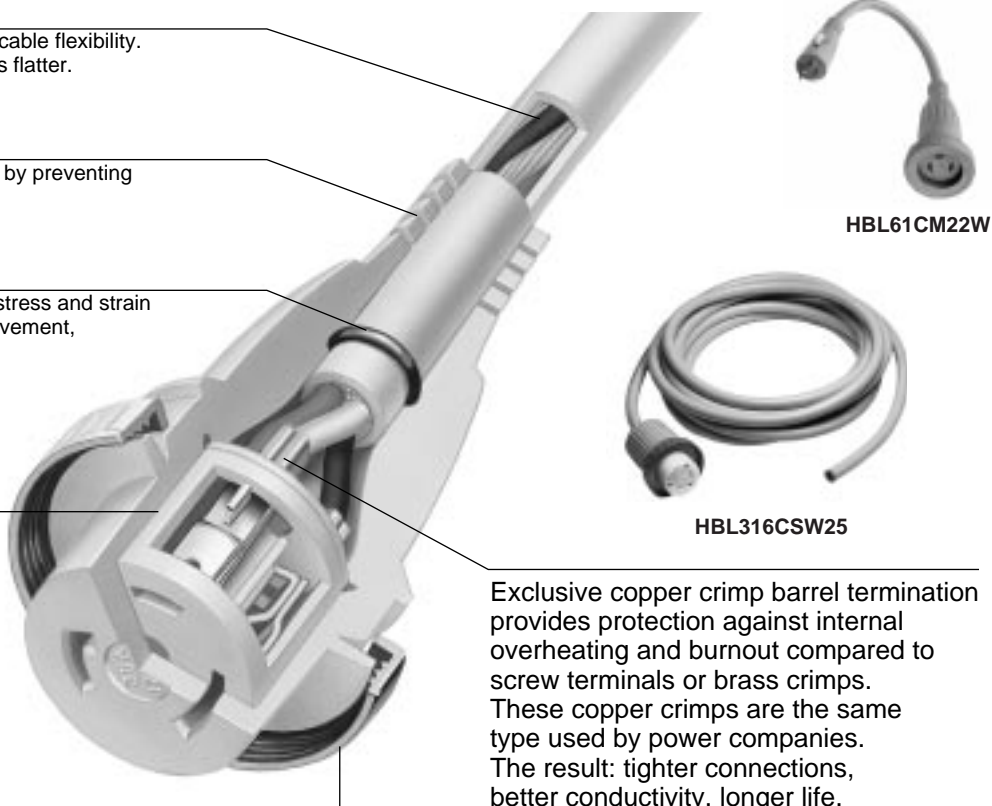

Jute fillers inside jacket for maximum cable flexibility. Hubbell cable coils neater, lighter, lays flatter.

Molded flexneck adds life to cable set by preventing right-angle cable damage and pullout.

Strain relief bull ring protects against stress and strain on the conductors caused by boat movement, crew traffic, rough handling.

Molded design totally encased in solid PVC material, for superior waterproofing and durability.

Locking ring assures proper alignment of connector to inlet for complete contact and waterproofing. Prevents accidental disengagement.

Exclusive copper crimp barrel termination provides protection against internal overheating and burnout compared to screw terminals or brass crimps. These copper crimps are the same type used by power companies. The result: tighter connections, better conductivity, longer life.
